ABOUT ME

Frontend Developer with over 4 years of experience building clean, responsive, and user-focused web applications. Most of my work is data-heavy: admin dashboards, management systems, and enterprise portals for government and business clients, built mainly with React, Next.js, and Vue.js. I specialize in WebGIS, turning spatial data into interactive maps with Leaflet, MapLibre, and Turf.js, and I also build high-converting landing pages. I care about clean, maintainable code, fast loading, and layouts that hold up on any screen.

WORK EXPERIENCES

Frontend Web Developer

Mar 2023 - Present

Sandbox Indonesia Juara, Klaten, Central Java, Indonesia

- Build high-performance, responsive web applications with React and Next.js.
- Lead development of enterprise systems, including admin dashboards, management portals, and geospatial mapping platforms, with advanced data tables, interactive charts, and multi-format export.
- Build SEO-friendly landing pages and company profile sites with close attention to performance and UI detail.

Mentor Frontend Web

Jan 2023 - Jun 2023

Pondok IT, Yogyakarta, Indonesia

- Mentored aspiring developers in core frontend technologies, from HTML and CSS to JavaScript and React.js.
- Built structured learning tracks, reviewed student code, and guided students through building real projects that followed modern development practices.

Frontend Web Developer

Nov 2022 - Mar 2023

1000 StartUp Digital x Gadjah Mada University, Yogyakarta, Indonesia

- Worked in an agile team to build and launch Team Up, an incubator platform for university startups.
- Turned design mockups into interactive, responsive interfaces and handled API integration and onboarding flows.

EDUCATION

Bachelor of Information Systems

Jul 2026 - Present

Universitas Terbuka, Jakarta, Indonesia

- Studying core computer science, software engineering, and data architecture while balancing coursework with hands-on development work.
- Manage my own study schedule and apply what I learn in class to real projects.

Web Engineering Program

Jan 2022 - Dec 2024

Pondok IT, Yogyakarta, Indonesia

- Completed an intensive web engineering program alongside character-building and personal development training.
- Worked through simulated high-pressure development projects in teams, building leadership, accountability, and communication skills for real industry workflows.

Islamic Studies

Jul 2017 - Jun 2021

PPTQ Imam An Nawawi, Tegal, Central Java, Indonesia

- Completed high school equivalent education, balancing the national curriculum with the discipline of Islamic boarding school life.
- Built analytical thinking, time management, resilience, and problem-solving skills through daily collaboration in a structured, communal environment.

TECH SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML, CSS, Sass, PHP, Python, SQL (MySQL)
- **Frameworks & Libraries:** React.js, Next.js, Vue.js, Nuxt.js, React Native, Redux, Pinia, Zustand, Node.js, Express.js, Tailwind CSS, Bootstrap, shadcn/ui
- **WebGIS:** Leaflet, MapLibre, Turf.js, Google Maps JavaScript API
- **Tools & Others:** Git/GitHub, Docker, Nginx, Supabase, RESTful API Integration, Postman, Swagger, Insomnia, Vercel, Netlify, Figma, Canva, Claude, Responsive Web Design

PROFESSIONAL & FEATURED PROJECTS

- **Profitku** (<https://profitku.id>): Integrated enterprise management platform with performance evaluation, SWOT analysis, KPI tracking, and organizational analytics, delivered as a landing page and an admin dashboard with data visualization.
Tech: Next.js, React.js, Golang, Bootstrap
 - **Sifortuna** (<https://sifortuna.tanamanpangan.pertanian.go.id>): National-scale WebGIS platform for monitoring plant pest and disease distribution, integrating Leaflet, Django, and Google Earth Engine, with a landing page and a CMS-backed admin dashboard.
Tech: React.js, Django, Leaflet, Google Earth Engine, Bootstrap
 - **Desa Pintar** (<https://desapintar.co.id>): Smart village platform with integrated admin tools (HRIS, CMS), citizen services, and WebGIS visualization.
Tech: Next.js, React.js, TypeScript, Tailwind CSS, Bootstrap, Django, Leaflet
 - **Dilan** (<https://dilan.klaten.go.id>): Digital governance system for villages in Klaten Regency, with regional administration, geospatial visualization, and citizen services.
Tech: Next.js, React.js, Tailwind CSS, Bootstrap, Django, Leaflet
 - **Siap**: Land administration information system with interactive map visualization of land parcels and ownership data.
Tech: React.js, Bootstrap, Django, Leaflet
 - **Simpatiku** (<https://simpatiku.kutaitimurkab.go.id>): Public service management platform for Kutai Timur Regency, combining a landing page with an admin dashboard.
Tech: Next.js, React.js, Bootstrap, Django
 - **Kanal Tapem**: Regional governance admin platform covering master data, budget plans, business trips, procurement, honorarium, and an incoming letter disposition workflow.
Tech: React.js, Bootstrap, Golang
 - **Broom**: Booking and scheduling platform for padel courts, serving venue owners and players.
Tech: React.js, Bootstrap, Python, Leaflet, Google Maps JavaScript API
- More projects at <https://mujahidin.my.id/projects>

PERSONAL PROJECTS

- **WorkDesk** (<https://workdesk.mujahidin.my.id>): Internal daily reporting and HRIS hub with attendance, leave, overtime, a shared work calendar, team chat, and Excel/PDF export.
Tech: React.js, TypeScript, Tailwind CSS, Supabase
- **StockDesk** (<https://stockdesk.mujahidin.my.id>): Multi-warehouse inventory management system with bin-level WMS, FEFO picking, stock opname, and FIFO/average valuation.
Tech: React.js, TypeScript, Tailwind CSS, Supabase
- **Mekar Ayu** (<https://mekar-ayu.vercel.app>): Privacy-first menstrual cycle tracker that keeps all data on the device, with phase predictions, daily logging, and PDF/Excel/JSON export.
Tech: React.js, TypeScript, IndexedDB
- **Mojepict** (<https://mojepict.vercel.app>): Lightweight, ad-free toolbox of online utilities for image editing, file conversion, color palette generation, and text tools.
Tech: Next.js, TypeScript, Tailwind CSS

CERTIFICATES

- Claude AI - Tixu.ai (2026)
