About Me

Frontend Developer with over 3 years of hands-on experience in modern web technologies. I specialize in building complex, data-driven applications, with a dedicated focus on Frontend WebGIS integration and spatial data visualization. I possess deep expertise in engineering high-performance management dashboards, including sophisticated data tables, interactive charting, and robust export functionalities. Beyond that, I also enjoy crafting high-conversion landing pages. Driven by a commitment to clean, efficient, and maintainable code, I excel at bridging the gap between rigorous technical requirements and intuitive user experiences to deliver robust digital solutions.

Work Experiences

Frontend Web Developer | Sandbox Indonesia Juara

Klaten, Central Java, Indonesia (March 2023 – Present)

- Architecting and engineering high-performance, responsive web applications using a modern ecosystem, including React and Next.js.
- Spearheaded the development of complex enterprise systems, focusing on administrative dashboards that incorporate advanced data tables, interactive graphical visualization, and optimized multi-format export features.
- Engineered high-conversion landing pages and scalable management portals, focusing on performance optimization, SEO-friendly structure, and pixel-perfect UI execution for data-dense geospatial mapping platforms.

Mentor Frontend Web | Pondok IT Yogyakarta

Yogyakarta, Indonesia (January 2023 – June 2023)

- Mentored and accelerated the onboarding of aspiring developers in core frontend engineering technologies.
- Designed structured learning tracks for HTML, CSS, JavaScript, and React.js, conducting comprehensive code reviews and guiding students through building production-ready projects to foster modern development best practices.

Frontend Web Developer (Intern) | 1000 StartUp Digital, Gadjah Mada University

Yogyakarta, Indonesia (November 2022 – March 2023)

- Collaborated in an agile environment to develop and launch 'Team Up', an incubator web platform engineered specifically for university startups.
- Successfully transformed complex design mockups into interactive, responsive user interfaces while ensuring seamless endpoint integration and optimized user onboarding flows.

Education

Bachelor of Information Systems (S1) | Universitas Terbuka

Jakarta, Indonesia (July 2026 – Present)

- Focusing on foundational computer science, software engineering principles, and data architecture while balancing academic theory with advanced development practices.
- Cultivated exceptional self-driven learning capabilities and structured time-management disciplines to effectively bridge rigorous academic methodologies with scalable, real-world software engineering solutions.

Web Engineering Program | Pondok IT Yogyakarta

Yogyakarta, Indonesia (November 2022 – December 2024)

- Completed an intensive web engineering program combined with professional character building and personal development tracks.
- Actively engaged in high-pressure modern development simulations to foster leadership, accountability, and strong communication skills within collaborative software engineering teams, ensuring absolute readiness for standard industry workflows.

Science and Islamic Studies | PPTQ Imam An Nawawi

Tegal, Indonesia (July 2017 – June 2021)

- Completed high school equivalent education that balanced a rigorous national academic curriculum with intensive Islamic boarding school disciplines.
- Cultivated strong analytical thinking, structured time-management habits, and exceptional resilience through a highly disciplined community environment, while developing robust critical thinking and collaborative problem-solving skills.

Tech Skills

- Programming Languages: JavaScript (ES6+), PHP, SQL, Python
- Frameworks & Libraries: React.js, Next.js, Vue.js, Nuxt.js, Redux, Zustand, Tailwind CSS, Bootstrap, shadcn/ui
- Tools & Others: Git/GitHub, Leaflet.js, Responsive Web Design, Figma, Nginx, RESTful API Integration

Professional & Featured Projects

- **Profitku** An integrated management platform for companies and organizations equipped with SWOT analysis, KPI tracking, and advanced performance modules.
- **Sifortuna** A national forecasting information system featuring interactive data dashboards for monitoring plant pests and diseases.
- **Desa Pintar** A specialized village administration portal and website designed to support local government digitalization.
- **Broom** A modern management and booking platform for organizing padel courts, built with trendy, user-centric interfaces.
- **Team Up** A specialized incubator web platform engineered to connect team members and startups at Gadjah Mada University.

- **Simpus** A digital health center management system built to streamline and support local public healthcare administration.
- **Muhammadiyah Expo 2023** A robust registration and digital information system built for large-scale event management.

Personal Projects

- **Sakifi** A practical reference platform for sharia-compliant transactions, equipped with structured articles, legal documents, and reference lookups.
- **Mojepict & Randomix** A suite of frontend-only web utilities and tools tailored for daily activities, from asset tools to automated sports team balancing.

Certificates

- Frontend Web Division Graduate – Pondok IT, Yogyakarta (2024)
- React + Redux Certified – SoloLearn (2023)
- JavaScript Developer – SoloLearn (2023)
- Responsive Web Design – SoloLearn (2023)
- Web Development Fundamentals – SoloLearn (2023)

Languages

- Indonesian – Native
- English – Intermediate (Professional Working Proficiency)
- Arabic – Basic / Reading Proficiency
- Japanese – Beginner
